

Put the brakes on distracted driving.

Safe Drivers

Stop drivers from using devices while driving with device locking to **decrease accidents**

Enhanced Customer Service

Send calls to a live representative or voicemail so **opportunities are not missed**

Improved Communications

Notify drivers of all calls after their trip so they can **follow up with customers**

PortNexus Associate PLEDGE® is an application that locks devices to prevent distracted driving.

Solution Includes.

- Customizable phone locking software
- Automatic call routing
- GPS tracking to track driver location
- Mounting case for additional hands-off usage
- Reports on distracted driver behavior

laura.2.kelly@sprint.com

How it Works:

Associate PLEDGE controls mobile device functionality while driving.

- 

The Sprint Network locks phones automatically if associates are driving
- 

Calls and messages are routed to voicemail or designated representatives
- 

Notifications for missed calls and messages are sent to driver after trip is complete

Route calls automatically via the Sprint Network based on driving status
