# Cut out distracted driving with Associate PLEDGE®

Decrease costs for accidents and injuries

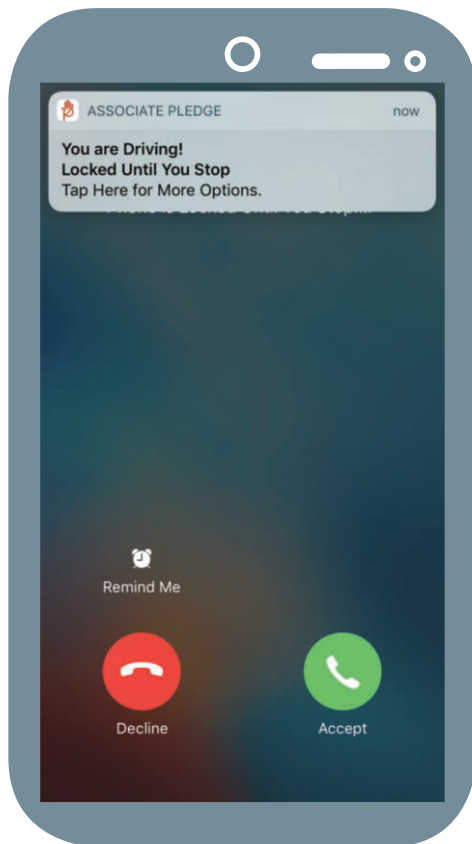

Improve driver safety with device-free driving

Enhance customer service with driver-designated representatives

Keep drivers in the loop with delayed call and message notifications

Eliminate distracted driving with the only Network-driven solution that automatically reroutes calls to driver voicemail or driver-designated representatives.

## Associate PLEDGE helps increase safety and productivity

- Locks phone screen while devices are in motion
- Routes calls and messages via the Sprint Network to voicemail or designated representatives
- Provides different phone-access policies per user
- Unlocks phone for emergency situations
- Delays call and message notifications to keep drivers focused on the road

Route calls automatically via the Sprint Network based on driving status

## How it Works

Associate PLEDGE controls mobile device functionality while driving.

1.

The Sprint Network locks phones automatically if associates are driving

2.

Calls and messages are routed to voicemail or designated representatives

3.

Notifications for missed calls and messages are sent to driver after trip is complete

**Increase your drivers' safety and improve your bottom line**

### Solution Includes:

- Customizable phone locking software
- Enhanced Sprint network call-routing technology
- Caller-driven decisions to reach driver's voicemail or driver's representative
- GPS tracking to know drivers' locations
- Optional mounting case for additional hands-off usage
- Accurate reports on distracted driver behavior to correct unsafe driving
