

Works for Business™

Secure your messaging communications.

Sprint Secure Enterprise Messenger makes safe mobile communication a reality with encryption and other security features.

Benefits

Send confidential communications and files safely with encryption

Help ensure compliance with privacy policies and regulations such as HIPAA, FINRA and SOX

Know messages are received with message delivery notifications and read receipts

Require PIN-code access for additional security

Keep secure message and conversation trails with message archiving

Remotely lock a mobile device and wipe messages or set message self-destruct timeframes

Meet the varying privacy needs of your organization with Sprint Secure Enterprise Messenger.

Sprint
Business

Keep your teams connected with the Sprint Enterprise Messaging suite.
