

Works for Business<sup>®</sup>

# Curiosity<sup>™</sup> Smart Video Analytics helps organizations, cities and public spaces make smarter decisions with data-driven insights.

This highly-adaptable and intelligent video analytics solution integrates data, video sources and existing video assets to make businesses, facilities, campuses and cities safer and smarter by applying advanced analytics techniques.

## Benefits:

- Keep traffic flowing and transit safe with integrated video, data and alerts
- Protect students on campus while achieving operational excellence
- Provide downtown area insights on foot traffic, parking, transportation and more
- Drive retail success with business intelligence and insights

## Features:

- ✓ Intrusion Detector and Object Detector use reactive recorded video as an intelligent security platform
- ✓ Traffic Analyzer and License Plate Recognizer improve transportation, security and safety
- ✓ Queue Detector and Activity Visualizer enhance the customer experience and increase ROI

**98% of video footage is not seen by anyone, let alone acted upon.\***

# Curiosity Smart Video Analytics

Integrates disparate systems and sensors to provide a complete view of seemingly different data points in a single pane of glass. The solution helps drive actionable intelligence through an automated workflow and visualization of distinct events.

<p><b>Proactive Video Security</b></p>	 Intrusion Detector	 Object Detector	 Camera Health Monitor	 Video Enhancer
<p><b>Efficient Traffic and Parking</b></p>	 Traffic Analyzer	 License Plate Recognizer	 Parking Space Analyzer	 Direction Controller
<p><b>Improved Operations and Experience</b></p>	 People Counter	 Activity Visualizer	 Queue Detector	 People Counter 3D

## Additional Business Benefits:

- Enterprise-scale video management to solve high-availability, redundancy, scalability and cost issues with a secure and open platform.
- Smart video analysis to get near real-time business insights and alerts with advanced analytics.
- Configurable rules for informed decisions to easily create rule-based alerts and automate actions with intuitive GUI.
