

# Microsoft 365 from Sprint

Which license do you need?

**Microsoft 365 combines the best-in-class productivity of Office 365 with advanced security and device management capabilities.**

It's collaborative, scalable and fully subscription based, so you only pay for what you need. But with so many great features, it can be tough to find the best combination for your business.

Take a look at this guide to learn more about the key features and decide whether your organization needs a Microsoft 365 Business, E3, or E5 license.

## Features

**Access:** An easy-to-use tool for creating business applications, from templates or from scratch. With its rich and intuitive design tools, you can create functional applications fast.

**Azure:** The world's fastest-growing cloud services give you the freedom to build, manage, and deploy applications on a massive, global network using your favorite tools and frameworks.

**Bookings:** Customers can visit your website, choose a service, and book, reschedule or cancel an appointment with ease. Plus, you can send automated confirmation emails and calendar invitations.

**Customer Manager:** Automatically organize information, including emails, meetings, calls, notes, tasks, deals, and deadlines in one place.

**Delve:** A tool to manage your Office 365 profile, and discover and organize the information that's most interesting to you right now—across Office 365.

**Exchange:** Collaborate on your critical documents and work with a focused inbox that prioritizes important messages and adapts to your work style, so you can get more done faster.

**Excel:** Use templates to create spreadsheets or build your own from scratch, and perform calculations with sophisticated formulas and automatically organized data sets.

**Invoicing:** Convert estimates to neatly designed invoices in minutes with customizable templates—and email them straight to your customers.

**Intune:** A cloud-based enterprise mobility management service that protects your data while enabling workforce productivity.

**MileIQ:** A mileage-tracking tool that works in the background—there are no buttons to press. Your miles are automatically logged, creating a complete record of all your tax-deductible and reimbursable mileage.

**MyAnalytics:** A personal dashboard that shows you how much time you spend in meetings and email, how many uninterrupted hours you spend on key tasks, which colleagues you work with most, and how much you work outside business hours.

**OneDrive:** Easily store and access personal and shared work files in Office 365, including Microsoft Teams, from all your devices. Any offline edits are automatically uploaded next time you connect.

**OneNote:** Get organized in notebooks you can divide into sections and pages. With easy navigation and search, you'll always find your notes right where you left them.

**Outlook:** Work efficiently with email, calendar, contacts, tasks, and more—together in one place.

**Planner:** Create a new plan, build a team, assign tasks, and update its status in a few easy steps.

**Power BI Pro:** A cloud-based business analytics service that analyzes data with speed and efficiency. It includes extended data source support, data capacity, team collaboration and admin capabilities.

**PowerPoint:** Create presentations with beautiful design, rich animation, cinematic motion, 3D models and icons.

**Publisher:** Create professional layouts with text, pictures, borders, calendars, and more. Everything you add stays exactly the way you've designed it, in print, online, or in an email.

**SharePoint:** Simple sharing of files, data, news and resources with team sites for every project team, department and division. Collaborate effortlessly and securely inside and outside your organization, across PCs, Macs, and mobile devices.

**Teams:** Host audio, video, and web conferences, and chat with anyone inside or outside your organization.

**Word:** Write and edit with intelligent spelling, grammar and stylistic suggestions and move from pen and paper to digital inking easily.

**Yammer:** A social networking tool for your business—give everyone the freedom and flexibility to work together the way they want.

# Why Sprint?

## Sprint Carefree Cloud Support

With Sprint, you get all the powerful features of Microsoft 365 in one cloud-based package with our Software-as-a-Service expertise through Sprint Carefree Cloud. You'll get additional step-by-step assistance to help ensure your migration is completely friction-free, so you'll be up and running in no time.

Whether you want self-deployment resources or full migration support (or anything in between), we're here for you.

## Microsoft Gold Cloud Productivity Reseller

We're a Microsoft Gold Cloud Productivity reseller – and that means we've got a specialized ability to get you up and running fast and effectively with Microsoft 365, thanks to our teams of Microsoft Certified Professionals.
